MINI PROJECTS:

- The Objective of the project is to design and implementation MOVIE TICKETING using JAVA. Our project work movie tickets can be booked in different theaters. And payment modes are different like Credit Cards, Phone Pay, Google Pay and Paytm. In it we have made you select different types of show times like first show, second show and matinee show etc...And I made it very user friendly
- The mini project title is "Career Edge" Recruitment Management System done by all the team. I am the team lead. This platform is designed to work like LinkedIn. And internship (paid and stipend), courses and jobs are designed to be user friendly for freshers. And in this, after uploading the resume, we have designed to have a direct interview with HR if selected.
- The project title is E-Waste Facility Locator. We will discuss this project with your team and I am the team lead for this too. This project collects E-waste like electronic waste. We have created the transport and website for the E-waste facility. If someone goes to this website, logs in and selects a location, Transport will go there and collect the wastage.
